

## REVEAL PLATFORM: THE ULTIMATE METALLURGICAL MACHINE VISION PLATFORM – QUALITY MONITORING SOLUTIONS FOR ALL PROCESSES

Our products Reveal CAST, Reveal TAP and Reveal 360 are built utilizing the hardware and software components of the Reveal Platform. The platform ensures that all products work seamlessly together and all measurement data can be viewed, analysed and shared between processes and users. New solutions built on top of the Reveal Platform can be easily extended and customized to meet even the most challenging process requirements.

### ONE PLATFORM - MULTIPLE PRODUCTS - COUNTLESS SOLUTIONS

## FEATURES OF REVEAL PLATFORM

## BENEFITS OF REVEAL PLATFORM

- Monitor development projects more effectively: improve process documentation and traceability throughout the whole organization
- Improve quality: defect detection at the earliest stage
- Improve safety: operator can remotely see and monitor in real time high temperature processes
- Achieve economies of scale: increase volume output and productivity with fewer people
- Globalize your workforce: employees worldwide can access the cloud
- Improve accessibility: you have access to the data anytime, anywhere.
